- Built with Vite, using NodeJS, React, Tailwind, Bootstrap.
- Collection of useful web components for anyone who needs them.

CHESS CLOCK

Self-employed project

thureindev.github.io/chess-clock

- Using HTML, material UI CSS and Vanilla JavaScript
- Simple chess clock. Mobile responsive.

SHORT

I studied computing and business management in college. After graduation, I worked office jobs and taught basic programming to teenagers. Through my classroom experience, I realized I still have a lot to learn. Teaching pushed me to study more.

I love to challenge myself to learn new things. And I also love sharing what I've learned. My experience as a programming tutor reflected me on my research skills, organizational skills and my improving my learning techniques.

In 2022, I decided to polish my programming skills to work as a web developer. I started learning CS50, back to basic, and then I learned HTML, CSS, JavaScript, React, and Node.js. And moving on to Frameworks and Libraries like Next.js, Tailwind CSS, and Express.js. And of course, Git and Docker for deployment.

SOFT SKILLS

- Teamwork
- Communication
- Problem solving
- Critical Thinking
- Time management
- Organizing
- Self learning
- Enthusiastic learner

EXPERIENCE

WEB PROJECTS

Self-employed

2022 - present

- I've been learning by building projects.
